About QUBE	32
------------	----

# Welcome to Brookleigh

Surrounded by beautifully landscaped parklands, vineyards and natural bushland, Brookleigh Estate is the perfect setting for your family to grow and experience everything life has to offer in the Swan Valley.

Located on the corner of Patricia Street and Arthur Street in Caversham, Brookleigh Estate is 15km North-East of the Perth CBD and just minutes from Perth's renowned Swan Valley.

When you choose to live at Brookleigh Estate, you're investing in a quality lifestyle. A future where a master

planned approach builds a strong foundation for a friendly and secure community.

Brookleigh Estate has been designed as a sustainable and environmentally sensitive master-planned estate. These Guidelines have been developed to assist you in designing your new home and to help you reduce your energy consumption and water use.

These Guidelines show how together, we can help protect your investment, save money, help the environment and build a better community.

# Welcome to Brookleigh

# Welcome to Brookleigh

## Guidelines

Your house design should be consistent with these guidelines. In return, your house will save you money and give you the lifestyle you deserve.

Good design, construction and ongoing function of your home and garden will ensure sustainable living for the next generation.

QUBE Property Group has made it easy for you to benefit, working with a number of WA's leading home builders to establish a Display Village in the Estate that showcases best practice design and building methods.

At Brookleigh Estate, residents will value:

- A safe and friendly neighbourhood
- Contemporary designs and living
- Use of alternative and innovative materials
- The creation of a true community
- Collective environmental sustainability

Please note that should these Guidelines differ from the Restrictive Covenants, the Restrictive Covenants will prevail.

# Welcome to Brookleigh

## What is Sustainability?

At Brookleigh Estate, sustainability is about creating a comfortable way of life for now and into the future that doesn't cost the Earth.

At Brookleigh Estate, sustainability ranges from the design of the Estate to capture prevailing breezes and natural light through to waterwise irrigation of parks and streetscapes.

These initiatives will ensure a more sustainable community at Brookleigh Estate.

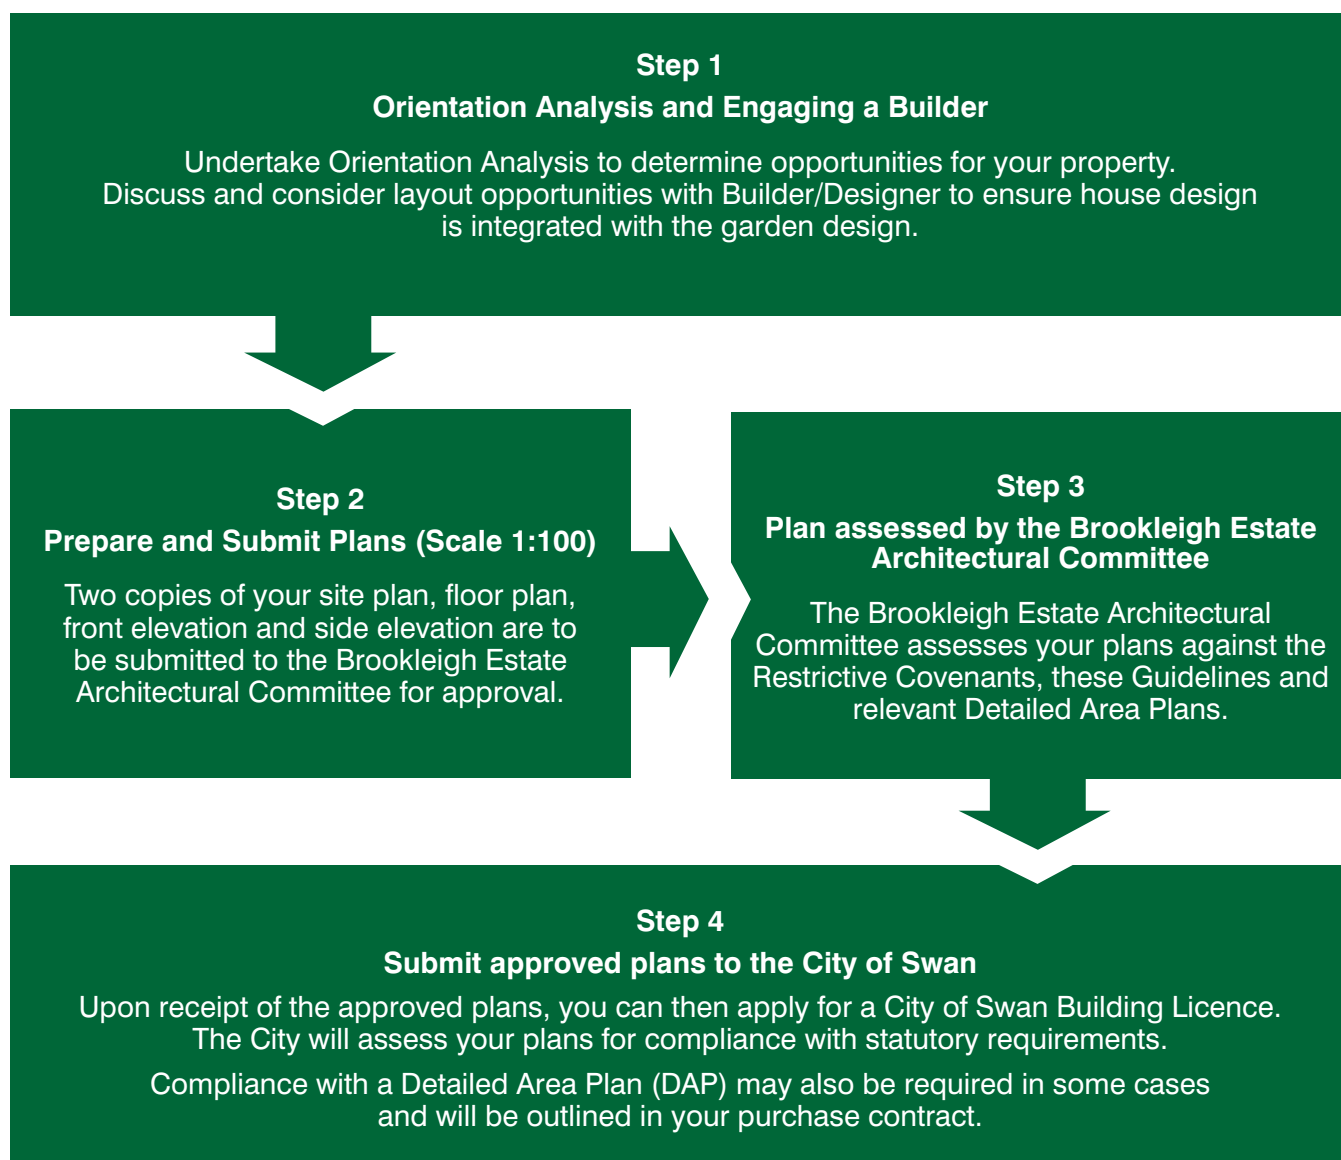

# Welcome to Brookleigh

## How do I get Approval?

The diagram below shows the steps to obtaining approval to build your new home.

Approval is required to ensure Brookleigh Estate continues to remain both sustainable and of a high standard.

These Guidelines have been prepared to reflect the Covenants attached to your purchase contract.

# Welcome to Brookleigh

## Restrictive Covenant Item 1 states:

For the purposes of enhancing the amenity of the Brookleigh Estate of which the Property is a part, the Buyer acknowledges that:

- 1.1 During the period of 10 years from the date of registration of the Deposited Plan at Landgate the Buyer will not construct, erect or externally renovate any building or other building structure appendage or improvement of any kind (including, but not limited to, outbuildings, car parking areas, structures, landscaping, undercover and open storage areas, fences, walls and television radio and other antennae) on the Property without first obtaining the prior written approval of the Architectural Committee (which approval is not to be unreasonably withheld).
- 1.2 The Seller encourages the Buyer to use its best endeavours to construct a residence:
  - 1.2.1 that adopts Energy Efficient and Waterwise principles, including:
    - 1.2.1.1 passive solar design;
    - 1.2.1.2 weather sealing on external doors and windows;
    - 1.2.1.3 maximising the use of natural light and ventilation;
    - 1.2.1.4 eaves;
    - 1.2.1.5 use of water-conserving appliances and fittings; and
    - 1.2.1.6 water-conserving landscaping;
  - 1.2.2 that adopts Quiet Home Design Principles.

## Restrictive Covenant Item 2.1 states:

- 2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:
  - 2.1.1 the plans and specifications have been approved by the Architectural Committee;
  - 2.1.2 the plans and specifications have been approved by the relevant planning and local authorities;

# House Design

## Introduction

The design of your home is important as it reflects both your family's needs and desires. The design of your home and your neighbour's home adds to the quality of the neighbourhood, improves the value of all residents' homes within the Estate and creates a friendly streetscape.

House designs should:

- be appropriate in appearance and size
- face onto the street with windows and doors
- include a mix of materials
- be friendly to neighbours

# House Design

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

2.1.3 the minimum living area (measured using the outside dimensions of the walls enclosing the dwelling) is 150m<sup>2</sup>, exclusive of patios, balconies, verandahs, storage areas, workshops, pergolas and any attached garage or outbuilding, unless the Lot is a Multi Residential Lot;

2.1.4 where the Property is less than 480m<sup>2</sup>, the minimum living area of the residence (measured using the outside dimensions of the walls enclosing the dwelling) is 130m<sup>2</sup>, exclusive of patios, balconies, verandahs, storage areas, workshops, pergolas and any attached garage or outbuilding, unless the Lot is a Multi Residential Lot;

2.1.5 it is a single residential dwelling (unless the Property is a Multi Residential Lot) and either single or double storey (or any alteration or addition to a dwelling) and uses wall materials which are predominantly concrete, clay bricks, stone or other similar materials in face work or renders;

## House Size

It's a fact that whilst Australian families have been getting smaller, house sizes have been getting larger over the past thirty years. At Brookleigh Estate we're conscious of your need to build a comfortable home to suit your family's lifestyle.

In creating a more sustainable development we urge residents to consider the long term financial impact of energy costs in running a large house and whether it really suits your family's needs.

One and two storey houses can easily be accommodated in Brookleigh Estate. Depending on your lot size, you will also need to meet site cover and house size requirements as detailed in the table below.

Development Standards	Max. Site Cover	House Size (Living Area)	Height
<b>Lots with 13m frontage or less and up to 480 square metres in size.</b>	60%	Minimum 130 square metres	Up to two storeys
<b>Lots with frontage greater than 13m and up to 480 square metres in size.</b>	55%	Minimum 130 square metres	Up to two storeys
<b>Lots above 480 square metres in size.</b>	50%	Minimum 150 square metres	Up to two storeys

# House Design

## Orientation

To enhance both your lifestyle and investment, houses should be orientated and designed to maximise natural light, views and breezes. You can help keep your home cooler in summer and warmer in winter by:

- using the topography to your advantage by including design elements like garden terraces
- where possible locating your garage on the eastern or western frontage to block out harsh summer sun
- increasing the size of windows to take advantage of a park / tree lined aspect
- positioning backyards or courtyards to capture prevailing breezes
- being neighbourly:
  - ask where will my neighbours be placing their house?
  - will my house overshadow their outdoor activity areas?

Please note additional lot layout considerations may be required which are addressed in greater detail through Detailed Area Plans which if applicable will be attached to your purchase contract.

# House Design

## Corner Lots

House designs on corner lots should address main and secondary streets to create a safe, attractive and well landscaped streetscape, whilst also maintaining private open space.

Building requirements for corner lots are shown below for your consideration.

Restrictive Covenant Item 2.9 states:

2.9 In the case of a corner lot, no residence shall be erected on the Property unless:

2.9.1 the residences secondary street elevation matches the primary street elevation in colours, materials, openings and/or roof form for a minimum distance of 4m from the truncation of the corner of the Lot; and

2.9.2 the side boundary fencing finishes at least 4m from the truncation of the corner of the Lot.

# House Design

## Laneway Lots

For lots with rear laneways, the design of your home frontage will need to address:

- the main street or park frontage
- vehicle access is to be solely obtained from the laneway
- garage doors are not to overhang into the lane when opened or closed

# House Design

## Energy Efficient Design

Your home should take full advantage of natural heating and cooling systems. The energy efficient design of your home will reduce heating and cooling costs, energy use and create a more comfortable environment.

For energy efficiency to be effective, the following principles should be followed:

- orientate your home towards the north, with main living areas on the northern side of the lot
- laundries, bathrooms and some bedrooms should be located on the southern side of the lot, where access to northern light is less necessary

Deciduous trees allow for winter sunlight

Eaves protect from harsh summer sun

Thermal mass to collect and radiate winter solar energy

- north facing windows should be shaded through a combination of eaves, verandahs or awnings to block the summer sun but allow winter sun to warm your home
- allow for cross-ventilation by locating windows that open to capture prevailing breezes
- minimise windows that face the western summer sun and provide shading to these areas of the home
- all homes in Brookleigh Estate should include eaves (to a minimum of 450mm) to maximise shading opportunities
- a concrete slab and brick walls or alternative similar materials help to provide 'thermal mass' and heat the home during winter
- ceiling insulation will enable the temperature inside your home to be moderated throughout the year
- ensure your home is fitted with energy efficient light fittings, appliances, plumbing and hot water services
- ensure weather seals are provided on all external doors to stop heated or chilled air from escaping

These energy efficient design principles will help to reduce your energy costs and assist to address the six tonnes of greenhouse gases produced by an average Western Australian household every year (SEDO, 2008).

# House Design

## Setbacks

Your setback is the distance between the front road reserve and your house and garage. Consistent setbacks throughout Brookleigh Estate will help to tie the neighbourhood together. Consistent setbacks promote safer streets by encouraging 'eyes on the street' and also provide room for landscaping, improving the attractiveness of the area.

Setbacks throughout Brookleigh Estate are generally defined by the 'Residential Design Codes' and enforced by the City of Swan.

The following general provisions apply:

- front setbacks for traditional lots are a minimum 3 metres and a maximum of 6 metres
- front setbacks for cottage lots (refer to Detailed Area Plans) are a minimum 3 metres and a maximum of 4.5 metres
- garages should be setback a minimum 4.5 metres from the front boundary ensuring they do not dominate the streetscape and must not protrude more than 2 metres beyond the main building line of your house
- the setback of your home to a northern boundary (except where it is to a street) should provide for adequate access to sunlight consistent with the Energy Efficient Design section outlined previously

Some setbacks may be altered through the 'Detailed Area Plans' relating to some lots.

## Façade and Materials

At Brookleigh Estate we encourage contemporary façade designs and materials that fit in with the street and promote a modern style of Australian architecture. By addressing the following pointers with your designer, a strong character can be developed throughout the Estate, adding the benefit of 'value' to every home:

- a proportional mix of at least three materials in the design of your home's main street façade including
  - complementary brick colours, glass, wood, stone and rendered cement
- windows addressing the street should be balanced with the front door and garage to create a friendly and welcoming building face
  - this can also improve safety and security of the street
- front facades should not contain large, blank or featureless walls
  - Use appropriate proportions to break up large walls with windows - the use of complementary materials, colours and/or alterations to the building setbacks
- the use of verandahs, porticos and porches will provide a welcome and protective entry to your front door whilst also providing an area to sit and enjoy your neighbourhood
- strong colours are not prohibited, but their use should be complemented with a more dominant muted colour in order to provide definition to your home

A range of materials is encouraged in the design of your home. Materials should be consistent with the modern Australian 'look' and be appropriate to our climate.

Thought should be given to the use of new alternative materials, examples of which are demonstrated in the display homes and include:

- brick
- cement render
- glass
- timber panels

The use of dark materials is not allowed as they do not reflect heat from your home.

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

2.1.8 the primary frontage comprises a minimum of two colours or two materials (excluding windows) and any one of the following structures fronting the street:

2.1.8.1 a gable;

2.1.8.2 a gablet;

2.1.8.3 a bay window;

2.1.8.4 a balcony;

2.1.8.5 a portico;

2.1.8.6 a projecting corbel; or

2.1.8.7 a verandah;

# House Design

## Roof Design

Attention should be paid to the design and materials selected for your roof. Within Brookleigh Estate, it is recognised that roofing plays a significant part in the architectural interest and energy performance of your home.

The following requirements should be followed:

- roof design should be simple, light in colour and complement the style of your home
- corrugated iron, clay and certain concrete tiles are encouraged. Zinalume roofs can contribute to glare and are not allowed
- For a modulated roof form, the minimum pitch of the roof should be  $24^{\circ}$ . For a single roof form, the minimum pitch of the roof should be  $12^{\circ}$ . Contemporary curved skillion and flat roof types should also be considered
- eaves should be provided to all roofs, except where a boundary or parapet wall is proposed
  - minimum depth of 450mm is necessary to provide shading and architectural definition
- simplified guttering systems should also be considered to enable the installation of rain water tanks

**Skillion Roof**

**Pyramid Roof**

**Hip Roof**

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

2.1.9 the roof:

- 2.1.9.1 has a minimum pitch of  $24^{\circ}$  to the main roof for a modulated roof form;
- 2.1.9.2 has a minimum pitch of  $12^{\circ}$  to the main roof for a singular roof form; and
- 2.1.9.3 is constructed of clay or concrete tiles or custom orb metal deck sheeting;

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

2.2.5 has a roof made from zinalume

# House Design

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

- 2.2.1 does not contain a double garage (not a carport) sufficient for at least two motor vehicles;
- 2.2.2 comprises a garage outside the main roof area that does not match or complement the residence as to pitch of roof, material, design, colour and external appearance;
- 2.2.3 has a garage door protruding more than 2m forward of the main front building line;
- 2.2.4 comprises a garage with a front setback of not less than 4.5m or as otherwise stated in Detailed Area Plans (if applicable);

## Garages

To enhance the appearance of your home your garages should be designed to:

- integrate with the front building line of your home
- not take up no more than 50% of the frontage of the building
- ensure that they do not protrude more than 2 metres beyond the main building line of your house
- have a roof design that is similar to the roof of your home
- select a garage door that complements the colours and materials of your home

The above points will ensure the main façade of your home is a strong and welcoming element within the streetscape and not the garage.

# House Design

## Driveways

Driveways are a key part of your street presence and a key element when guests visit your home.

Driveways should be constructed of:

- brick paving
- liquid limestone
- block pave or feature concrete
- exposed feature aggregate

The use of standard grey, painted or insitu concrete is not permitted.

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

2.1.7 the residence has a driveway:

2.1.7.1 at least 4m wide;

2.1.7.2 constructed from brick paving, liquid limestone or exposed aggregate concrete;

2.1.7.3 that is completed before occupation of the residence; and

2.1.7.4 not constructed of grey, painted or in situ concrete;

# House Design

## Fencing

To create an open and welcoming street environment, front fences are discouraged throughout Brookleigh Estate.

Should your home front directly onto parkland, a well proportioned and designed fence that is visually permeable to allow for views will generally be provided by QUBE Property Group.

Rear and side fences will also generally be provided by QUBE Property Group, however the following guidelines should be followed:

- side and rear fences should be no higher than 1.8 metres
- fencing material should be of the same style and colour used throughout Brookleigh Estate
- if a side gate is required, it should be a material that is consistent with your home and the boundary fence
- where wing walls are proposed between your home and the boundary fence, they are to be constructed of a material consistent with its architectural style, colour and material palette

Should your property adjoin any retaining wall or fence installed as part of Brookleigh Estate, modifications to the wall or fence are not allowed other than for maintenance.

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

2.1.10 the fencing:

2.1.10.1 the rear and side boundary fencing is constructed of Bluescope Lysaght "Neetascreen" material (Colorbond colour Terrace) or similar and is at least 1.8m high;

2.1.10.2 in the case of a wall or fence from the residence to the boundary of an adjoining lot, that wall or fence is at 1.8m high and constructed from materials consistent with the rear and side boundary fencing, and set back at least 1m from the corner of the residence.

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

2.2.6 has fencing, which extends forward of the front building line of the residence unless expressly permitted by the Seller. For the purposes of these covenants, the front building line of the residence is:

2.2.6.1 the line of the front face of the bricks of the front wall of the residence;

2.2.6.2 where the front building line of any residence on a lot adjoining the Property is constructed behind the front building line of the residence, then the front building line of the residence is the same as the front building line of the residence on the lot adjoining the Property; or

2.2.6.3 any other front building line that the Seller in its absolute direction determines;

Restrictive Covenant Item 2.5 states:

2.5 The Buyer will not paint, alter or remove or in any way interfere with the structural integrity of any retaining wall erected on any boundary of the Property provided that this does not prevent the undertaking of any works or repairs to the retaining wall where necessary to maintain its structural integrity or its condition or where properly required by any relevant authority.

Restrictive Covenant Item 2.6 states:

2.6 In relation to a fence constructed by the Seller on a boundary of the Property the Buyer will not:

2.6.1 alter or remove the fence except as required to repair or replace the fence because of damage or wear and tear; or

2.6.2 repair or renew the fence with any materials which are not of the same nature, quality and standard as those originally used.

# House Design

## General Requirements

### Sheds and Outbuildings

Restrictive Covenant Item 2.3 states:

2.3 The Buyer shall not construct or permit to be constructed or bring onto the Property any:

- 2.3.1 any outbuilding over 10m<sup>2</sup> in floor area and over 2m in height whose design, appearance and external colours and textures are not integrated with and substantially match the residence on the Property;
- 2.3.2 outbuilding constructed of galvanised iron or painted fibrous cement walls except for any shed which has a floor area of less than 10m<sup>2</sup>, a maximum height of less than 2m and which is not visible from any road or other public area;
- 2.3.3 outbuilding constructed of fibrous cement which is not painted and has a floor area of less than 10m<sup>2</sup> and a height of less than 2m.

## Air Conditioning

Roof mounted air conditioning or cooling units must not:

- protrude above the ridge lines or gables, unless the air conditioning or cooling units are obscured from clear view from the public domain

Split system compressor units should be:

- located towards the rear of the building away from streets and public view
- located with consideration to your neighbours

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

- 2.2.7 has airconditioning or cooling units, which protrude above ridge lines and gables, unless the air conditioning or cooling units are obscured from clear view from the public domain and are positioned to minimise noise impact on neighbouring residents;

# House Design

## Solar Hot Water

Solar hot water unit panels and photo-voltaic cells are to be:

- integrated with and match the roof profile of your house

Traditional roof mounted solar hot water storage tank units are to be:

- positioned where they cannot be viewed from the street or public areas

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

- 2.2.8 has a solar hot water unit, unless the solar hot water unit is integrated with and matches the roof profile and pitch of the residence and does not protrude above the ridge line;

## Bins

During the construction of your home, a large waste bin needs to be placed on your property to ensure all waste materials are properly stored.

Once you've moved into your house, your rubbish and recycle bins must be screened from the public domain except on collection days.

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

- 2.1.13 during construction of the residence, a large waste bin is placed on the Property, with all waste materials to be properly stored in the waste bin.

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

- 2.2.11 has bin storage areas unless they are screened from view from the public domain, except on collection days; and

## Letterboxes

All homes in Brookleigh Estate must have a letterbox adjacent to the driveway on the property. Letterboxes should be clearly numbered and complement the residence.

For laneway lots, letterboxes shall be located on the primary street frontage. Letterboxes are not permitted on laneway boundary's. For lots fronting parks which have rear laneways, letterboxes will generally be provided by QUBE Property Group and will be located on the frontage fronting the park.

Restrictive Covenant Item 2.1 states:

2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

- 2.1.12 it contains a letterbox which is located adjacent to the driveway on the Property, is clearly numbered and which both matches and complements the residence;

## Clothes Drying

Clothes lines and hangers are to be located away from the public domain to prevent view from the public domain.

# House Design

## Communications Equipment

Erection of TV antennae's and radio masts is not permitted as all homes in Brookleigh Estate will be provided with fibre-to-the-home.

If a satellite dish is required it is to be located to protect the visual quality and amenity of the area. Where possible it should be:

- installed within the roof space
- located towards the rear of the building away from streets and public view
- located with consideration of adjoining neighbours
- avoid unnecessary extensions of heights

Restrictive Covenant Item 2.2 states:

- 2.2 No residence shall be erected on the Property which:
- 2.2.9 has TV antennae's or radio masts;
- 2.2.10 has satellite dishes, unless they are located in such a way that they minimise their impact on the visual quality and amenity of the area;

## Streetscape Protection

No parking of any commercial vehicle is allowed unless it is for the purposes of temporarily providing services to the property.

No repair or restoration of any motor vehicle, boat, or any other vehicle or machine may be carried out unless it is behind the building line of the property and screened from public view.

Restrictive Covenant Item 2.10 states:

- 2.10 The Buyer will not park any commercial vehicle (which includes a truck, bus, tractor, panel van or utility), boat or caravan on the Property unless it is invisible to public view;

Restrictive Covenant Item 2.11 states:

- 2.11 The Buyer will not repair or restore or allow any repairs or restoration work to be carried out to any motor vehicle, boat, boat trailer or any other vehicle or any other machine on the Property unless it is behind the building line of the residence and is invisible to public view;

## Signage

Restrictive Covenant Item 2.7 states:

- 2.7 The Buyer will not erect or display or permit to be erected or displayed on the Property any sign, hording or advertising of any description whatsoever without written approval by the Seller except:
- 2.7.1 a builder's sign during the period of construction of a residence on the Property;
- 2.7.2 a "For Sale" sign after a residence capable of occupation has been completed on the Property.

# House Design

## Raising of Animals

Restrictive Covenant Item 2.8 states:

- 2.8 The Buyer will not raise, breed or keep or permit to be raised, bred or kept any insects, reptiles, animals, livestock or poultry on the Property or any part thereof provided that this restriction shall not operate to prevent the Buyer from keeping up to four domestic pets on the Property.

## Display Homes

Restrictive Covenant Item 2.12 states:

- 2.12 The Buyer will not use or open or allow to be used or opened, any residence erected upon the Property for display purposes with the exception of Lots 1 – 9 (inclusive) and Lots 25 – 29 (inclusive) as shown on the Development Plan.

## Residence Type

Restrictive Covenant Item 2.1 states:

- 2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:
- 2.1.6 the residence is a non transportable residence

## Detailed Area Plans

Restrictive Covenant Item 2.1 states:

- 2.1 The Buyer covenants with the Seller that no residence shall be erected on the Property unless:

- 2.1.11 the residence or any other improvements constructed on the Property comply with Detailed Area Plans (if applicable);

## Lot Level Changes

Restrictive Covenant Item 2.4 states:

- 2.4 The Buyer will not change the average finished ground level of the Property more than 500 millimetres from the original median finished level of the Property without the consent of the Seller, provided that this does not include minor changes to parts of the Property for construction of swimming pools or spa baths, gardening and related landscaping purposes;

# Garden Design

Brookleigh Estate's natural features and open spaces are designed to promote a recreational outdoor lifestyle that encourages social interaction. The character and attractions in Brookleigh Estate stem from the natural landscape features like the existing creek line running through the Estate, surrounding vineyards, the nearby Swan River and native flora and fauna in the area.

A visual integration from private gardens to public parklands is important and the quality of landscaping in verges and front gardens will be a contribution to the overall scenery of the Estate and add significant value for all residents of Brookleigh Estate.

A consistent garden character throughout Brookleigh Estate will help to provide for an integrated neighbourhood feel and appearance and tie all elements within the Estate together.

Restrictive Covenant Item 2.2 states:

2.2 No residence shall be erected on the Property which:

2.2.12 does not have all ground areas which are visible from the road at the front of the residence properly landscaped within three months of completion of the residence including the verge. "Properly landscaped" means that all visible areas must be cleared and grassed, planted or otherwise covered with a vegetated beautifying surface and have a reticulated watering system installed.

# Garden Design

## Landscaping Bonus

The 'Special Landscaping Bonus' has been provided to give you a garden which matches both your lifestyle and the functional needs of your home.

Prior to the installation of landscaping and irrigation, you will need to submit a 'Landscaping Application Form' to QUBE Property Group's nominated landscape contractor to confirm your entitlement to the Bonus and to schedule a consultation. The 'Landscaping Application Form' will be provided to you once your purchase contract has been approved.

The Special Landscaping Bonus is conditional upon the conditions detailed in 'Annexure C' of your purchase contract being met. You will have the choice of one of three pre-prepared landscape designs of which our nominated landscape contractor will help you select during your consultation.

## Fencing Bonus

Brookleigh Estate's Fencing Bonus has been provided to ensure fencing throughout the Estate is consistent and integrated with streetscapes.

Prior to the installation of fencing, you will need to submit a 'Fencing Application Form' to QUBE Property Group's nominated fencing contractor to confirm your entitlement to the Bonus and to organise a time for the fencing to be installed. The 'Fencing Application Form' will be provided to you once your purchase contract has been approved.

The Fencing Bonus is conditional upon the conditions detailed in 'Annexure C' of your purchase contract being met. The 'Fencing Application Form' should be completed and returned before your house has reached the lock-up stage of construction. When returning the form, please also attach a copy of your site plan which shows the location of your house on your Lot.

# Garden Design

## Garden Design Principles

To gain maximum benefit and enjoyment for years to come, the right garden design is very important. To maximise the effect of your landscaping, it is recommended you consider these helpful hints

before your consultation with our landscape designer. These simple landscape principles will help create a comfortable and manageable garden to suit your current and future outdoor living areas.

Integrate your garden with the streetscape character to visually "borrow" landscape areas.

Use plants to frame or screen architectural features of your house.

Maintain views to the street for passive surveillance and neighbourhood security.

Use deciduous trees for summer shade and winter sun.

Retaining existing vegetation where possible.

Plant rear and side boundaries to assist with privacy and shade to your house.

Mulch garden beds to suppress weeds.

Group plants with similar water requirements.

Consider sustainable and recycled materials (i.e. recycled brick paving).

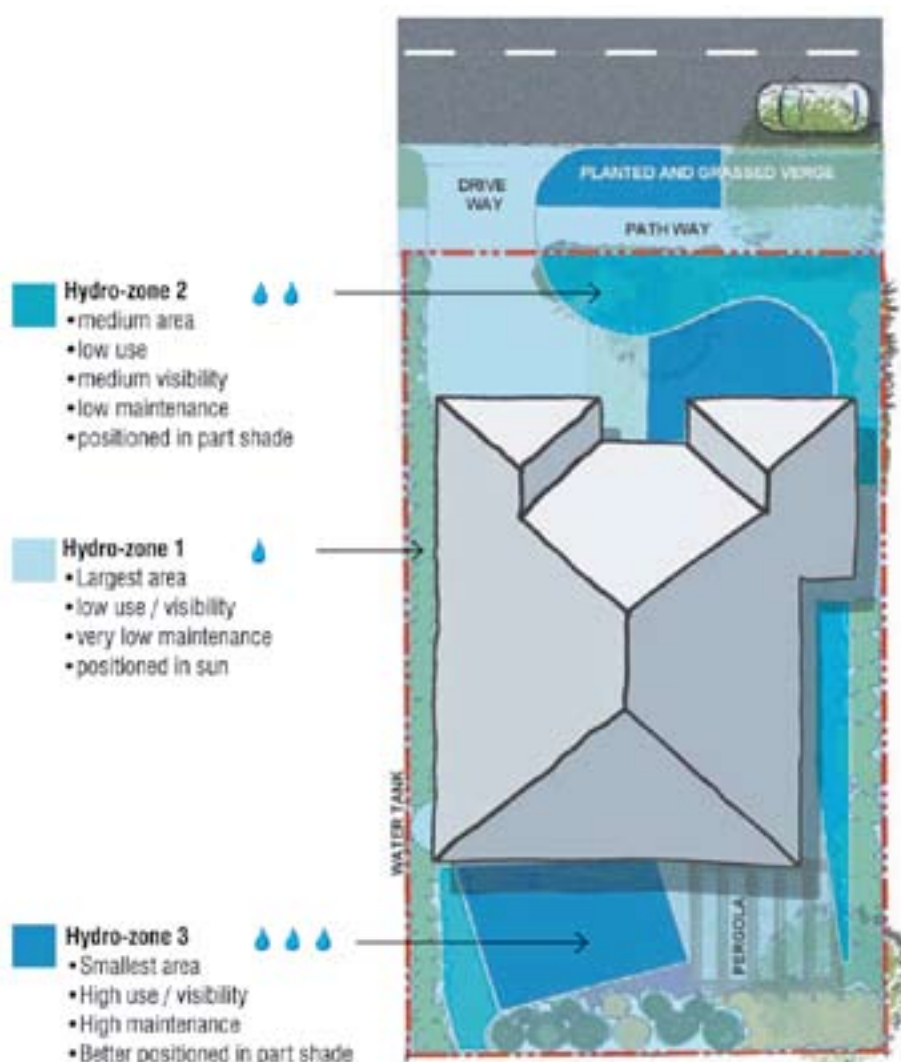

Choose plants that are compact and low maintenance.

# Garden Design

## Waterwise Gardens

Climate change and growing demand for water means water efficiency is becoming increasingly important. We recommend you consider the following helpful hints when planning your garden design to ensure your water consumption is reduced.

- The majority of plants should be compact local species.
- Use lawn only where it will be actively used.
- Avoid water features.
- Use electronically controlled irrigation systems.
- Use 'Hydro-zoning'
- (i.e. group plants with similar water requirements).
- Apply mulch to garden beds to reduce evaporation.
- Design paved areas to direct rainwater run-off to planted areas.
- Use groundcovers rather than paving in front of north facing openings to reduce heat load on your home.
- Use trees and shrubs to provide shelter from strong sun and winds to exposed sides of your home.
- The use of rainwater tanks and Grey Water Recycling Systems is encouraged.

Government rebates are available to new home owners employing waterwise initiatives, however please note rebate programs are subject to ongoing review with items intermittently added and removed. To find out more, please visit the Water Corporation's website at <http://www.watercorporation.com.au>

# Garden Design

## Australian Garden – Indicative Design & Ideas

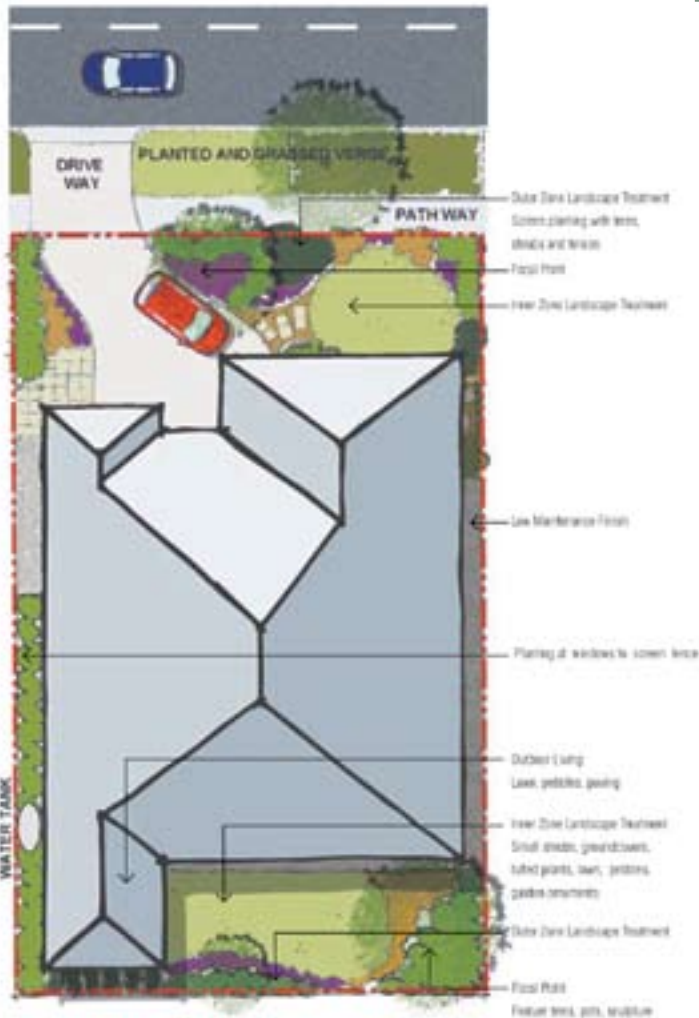

The Australian Garden has been designed to reflect the character shapes and features of typical Australian landscape.

Key design features of this garden are:

- Natural look of Australian landscape.
- Native / local plants (colours and smell).
- Mix of textures.
- Drought tolerant plants.
- Australian landscape shapes and sculptures.
- Use of native materials.
- Well defined view to and from the street.
- Well defined line between privacy and public space.

## Suggested Plant Species

SPECIES	COMMON NAME	MATURE HEIGHT
<b>Trees</b>		
<i>Agonis flexuosa</i>	Peppermint	10m 
<i>Callistemon 'Kings Park Special'</i>	Bottlebrush	4m 
<i>Eucalyptus sideroxylon</i>	Red Ironbark	20m

<i>Calothamnus quadrifidus</i>	One-sided Bottlebrush	2m 
<i>Dianella 'Little Rev'</i>	Little Rev	0.5m 
<i>Eremophila glabra</i>	Tar Bush	0.5m 
<i>Eremophila nivea</i>	Silky Eremophila	1m 
<i>Hovea pungens</i>	Devils Pins	0.5m 
<i>Lomandra longifolia</i>	Spiny-head Mat-rush	1m 
<i>Pimelea rosea</i>	Rose Bangine	0.5m 
<i>Verticordia plumose</i>	Plumed Featherflower	0.5m 
<i>Xanthorrhoea preissii</i>	Grass Tree	3m 

This concept has been prepared to assist you when consulting with our nominated landscape contractor. Our landscape contractor will confirm what elements of this design are included in your 'Special Landscaping Bonus'.

*Agonis flexuosa*

*Melaleuca quinquenervia*

*Calothamnus quadrifidus*

*Dianella 'Little Rev'*

*Hovea pungens*

*Xanthorrhoea preissii*

 **Drop Zone One** Low water consumption plant.  **Drop Zone Two** Medium water consumption plant.  **Drop Zone Three** Higher water consumption plant.

# Garden Design

## Contemporary Garden – Indicative Design & Ideas

The Contemporary Garden has been designed to suit bigger lots where the character of asymmetrical shapes can be well presented.

Key design features of this garden are:

- Asymmetrical shapes and well defined lines.
- Building architecture is mirrored in the landscape.
- Clear definition between the uses of each area.
- Young and modern architectural look.
- Balance between hard and soft landscape.
- Well defined view to and from the street.
- Well defined line between privacy and public space.

## Suggested Plant Species

💧 **Drop Zone One** Low water consumption plant.    💧💧 **Drop Zone Two** Medium water consumption plant.    💧💧💧 **Drop Zone Three** Higher water consumption plant.

# Garden Design

## Cottage Garden – Indicative Design & Ideas

The Cottage Garden has been designed to suit small to medium lots where the character of the classic shapes can be well presented.

Key design features of this garden are:

- Symmetrical shapes.
- Classic, traditional architectural look.
- Front yard filled with informally planted flowers.
- Cultivation of flowers, vegetables, herbs and other small plants.
- Grouping of same like plants.
- Repetition of plants.
- Colours to create balance and harmony.
- Mixed textures.
- Mixed plants (native and non-native).
- Well defined view to and from the street.
- Well defined line between privacy and public space.

## Suggested Plant Species

SPECIES	COMMON NAME	MATURE HEIGHT	
<b>Trees</b>			
<i>Citrus sinensis</i>	Orange	9m	💧💧

# Sustainable Living

## Our Commitment to Sustainable Living

QUBE Property Group is committed to achieving high quality sustainable living in all of its developments. By putting people and the environment first, QUBE Property Group recognises the importance of developing a strong sense of community and the need to live in harmony with the environment.

## Rebates, Incentives and Bonuses

You may be eligible to qualify for rebates from the Water Corporation, State Government and/or Federal Government to buy appliances and technologies that reduce energy use, water consumption and Greenhouse gas emissions.

It is important that you familiarise yourself with what is available and any impacts they may have on the design and construction of your home. Please note that rebate programs are subject to ongoing review with items intermittently added and removed.

To find out more about rebates and current incentives, please visit the following websites:
